June 2026	July 2026	August 2026
$35,000	$58,000	$52,000
25% confidence	25% confidence	25% confidence

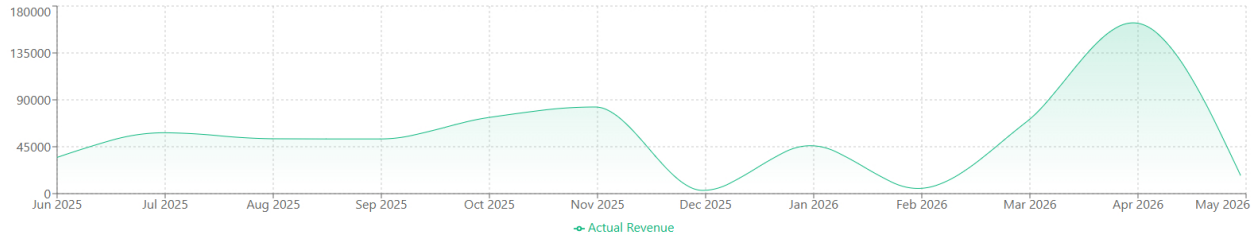

Key Trends

- High Revenue Volatility: The historical data shows significant month-to-month fluctuations in revenue, indicating an inconsistent sales performance.
- Seasonal/Event-Driven Dips: Recurring sharp drops in revenue observed in December, February, and May suggest potential seasonality or specific operational challenges during these periods.
- Untapped Lead Potential: While 348 leads are being generated, the 0.0% conversion rate indicates a complete breakdown in converting these leads into revenue, representing a significant missed opportunity.
- Inconsistent Growth Pattern: Despite occasional high-revenue months (e.g., April 2026), there is no sustained upward trend, with performance varying widely.

Recommendations

- Immediately investigate and resolve the 0.0% conversion rate. This is the most critical issue impacting future revenue and renders any revenue prediction highly speculative without intervention.
- Conduct a comprehensive audit of the entire sales process, from lead generation to closing, to identify bottlenecks and inefficiencies.
- Implement stricter lead qualification criteria to ensure sales efforts are focused on high-potential prospects.
- Provide targeted sales training to improve closing skills, objection handling, and product knowledge for the sales team.
- Analyze the causes of significant revenue dips (e.g., Dec 2025, Feb 2026, May 2026) to understand if they are seasonal or operational issues and develop mitigation strategies.
- Enhance collaboration between marketing and sales to ensure lead quality aligns with sales team capabilities and targets.
- Establish clear Key Performance Indicators (KPIs) for the sales pipeline, including conversion rates at each stage, and monitor them regularly.

Revenue Trend (Last 12 Months)

Sales Conversion Funnel

Leads	100%	348 (100%)
Qualified	0%	0 (0.0%)
Proposals	47.4%	165 (47.4%)
Accepted	1%	4 (1.1%)
Customers	0%	0 (0.0%)
Revenue	100%	$3066K (100%)
